

THIRD-PARTY RISK MANAGEMENT

Stop inheriting your vendors' breaches

Your security posture is only as strong as the weakest vendor in your ecosystem. Styx Intelligence scores, monitors, and alerts on vendor risk continuously, so you catch a problem vendor before it becomes a problem you have to solve.

The threat landscape

A vendor's security failure can lead to a data breach, regulatory fines, and reputational damage, even though the failure wasn't yours. Attackers routinely use third-party weaknesses as the way into well-defended organizations.

The existing tools gap

Most vendor risk programs run on point-in-time assessments that aren't revisited until renewal. Styx replaces the snapshot with continuous monitoring, dynamic scoring, and real-time alerts.

Illustrative sample data

CAPABILITIES

Every vendor in your ecosystem, scored in one place

Vendor risk scoring

A dynamic risk score for each vendor that tracks how it changes as new threats emerge or a vendor's posture improves.

- Weighs cyber posture, brand reputation, industry risk, and impersonation frequency
- Continuously refreshed signals, so the score reflects today, not the last assessment

Risk-based prioritization

Visualizes your full vendor ecosystem in a risk-based matrix, ranking vendors by exposure, criticality, and business relevance.

- Customizable scoring logic, weighted the way your team defines it
- Remediation effort goes to the vendors that matter most first

Automated security questionnaires

Distributes and manages security questionnaires from one place, keeping assessments current with evolving standards.

- Pre-built, customizable questionnaire templates
- Automated follow-ups and deadline tracking, with no manual chasing

Vendor reputation & breach alerts

Tracks how vendors are perceived in the press, on social media, and in online discussion.

- Real-time alerts when a vendor is breached
- Alerts on vendor mentions in dark web forums and marketplaces

01

Know your riskiest vendor before an incident

A live risk score means you never find out which vendor was the weak link after a breach.

02

Spend remediation time where it matters

Ranking by exposure and criticality focuses scrutiny on the vendors that could actually hurt you.

03

Stop chasing vendors for security answers

Automating the questionnaire loop gets your team answers without the follow-up emails.

CONNECTED IN STYX INTELLIGENCE

Iris AI Assistant · New

Ask plain-language questions about vendor scores, breaches, and which vendors need attention.

Risk Scorecard

Third-party risk rolls into one score you can track over time and show leadership.

Data Leakage & Dark Web

Get alerted when credentials or sensitive data tied to your business surface on the dark web.

Less risk, less manual work.

Styx keeps every vendor scored, monitored, and assessed continuously, so your team spends its hours on the vendors that matter.
